

LAM- 4 channel relay module RS485 MODBUS communication

- 4 opto-isolated inputs for dry contact input switch, not with voltage.
- 4 10A high current relay outputs.
- Using RS485 MODBUS RTU standard communication.
- You can easily embed the RS485 bus. An RS485 bus 32 modules can be attached, Software set address and other parameters.
- Address and other parameters are stored in EEPROM. Providing control sample source code.
- Standard industrial rail mounting.
- MODBUS standard provides test software.
- Wide power supply 9-24V supply.
