

LAM- 8 channel relay module RS485 MODBUS communication

- 8Relay outputs (SPST normally open SPST-1)
- Using RS485 MODBUS RTU standard communication , networking and configuration software can be , PLC, industrial touch screen , PC, etc.
- With communications and output status indicator
- Communication circuit lightning , anti-jamming design
- Signal acquisition and control can be widely used in industrial field devices
- Relay outputChannel 8 (SPST SPST)
- Relay contact capacity 2A / 250VAC 2A /30VDC
- Operating temperature range -20 ~ 70
- External power supply DC 9V ~ 30V /5W
- 1500VDC isolation protection
- Standard DIN mounting rail or screw mounting
- Dimensions 125 × 73 × 35mm
